

Securacem

Description:

Securacem is a glass ionomer cement for linings. Securacem adheres well to dentin and can be used underneath all filling materials. Securacem is self-curing and radiopaque and releases fluoride into the tooth. Securacem is available as a flexible powder/liquid system.

Properties:

- Self-curing
- Radiopaque
- Contains fluoride

Advantages:

- Fluoride release into the tooth
- Safe adhesion to enamel and dentin

Indication:

Suitable for linings under all filling materials.

Storage conditions: dry and protected from light at 0 - 22 °C

Shelf life: 3 years

Presentation:

WP4072: 15 g powder, 10 g liquid, dosage spoon

WP4092: 7 g powder, 5 g liquid, dosage spoon

WP4147: 10 g liquid
